

About AMADEUS TRANSPORT GmbH (Ltd):

AMADEUS EUROMOVERS is situated in Berlin, the Capital of Germany and has an established well-known name in Berlin and Brandenburg, since 1993.

AMADEUS Transport is a Member of the **EUROMOVERS Organization**.

Each Member who is located in Germany and Europe can guarantee moving and related services due to their area coverage. Coordination of transport and services is one of our strengths and is therefore increasing the efficiency of our network. Due to our common services and strong dedication to quality, we are working cost effective and are able to perform our quality services worldwide.

PROFILE

Quality does not "just arise", it can only be reached by hard work. This must be done each and every day by each and every colleague. The team of **AMADEUS** Transport is working in all moving related areas. Professionalism and motivation are the most important resources of our enterprise.

Another very important dedication of our company is the continued personnel training and expansion of our defined quality.

Working in accordance with our defined quality management is an obligation to each and every one of us. Close cooperation with our Customers, execution of special Customer needs to their best satisfaction, along with the highest quality standard, is one of our most important company objectives.

In our agent to agent relations we stand for:

- Origin and Destination Services according to international standards
- Competitive rates
- Individual Customer supporting services
- Comprehensive reporting
- ISO 9001:2000
- DIN EN ISO 12522-1 and DIN EN ISO 12522-2 (European recognized quality certification for shipment of HHGs)

THE MOVING TEAM

Each of our crew members are trained in the quality performance of moving services. They are used to work independently according to the contents of each service requirement. They are permanently employed and are performing their services with high motivation and to the greatest Customer satisfaction.

AMADEUS EUROMOVERS uses exclusively the newest technology of the truck-manufacturers:

MERCEDES-BENZ + SCANIA.

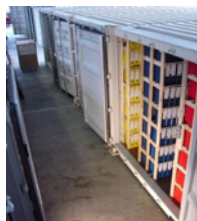

The vehicles are equipped according to their field of application with drawer device and a heated drawer inner room. The inside equipment is completed by padded walls and a stable ground.
